

The Board of Education appreciates the effort of its members, staff, students and community members towards achieving excellence in education. The board is also aware that there are often exceptional achievements and contributions made by representatives of the schools which bring credit to the entire school district. These are the people who accept challenges and set high standards for all to follow.

It is the board's desire to give official recognition for such outstanding efforts on behalf of the Hicksville School District.

Notice of people who qualify for such recognition will be given to the board in the Superintendent's Report. Other achievements which bring distinction to individual schools may also be similarly recognized.

A letter of recognition or certificate will be sent to deserving persons by the Board of Education. When the occasion warrants a public presentation, recognition can be given at a board meeting.

Each retiring staff member, trustee concluding his/her term of office, and employee completing twenty-five years of service, will be presented with plaque or other symbol and this award will become part of the board minutes.

Board Approval Date: January 30, 1985

Revised: December 21, 1994
